STACK

CODE

TypeScript, Go, Rust,
Python, Solidity, SQL

AI / ML

LLM extraction, RAG,
evals, QLoRA / PEFT,
vLLM, Ollama, MLX,
faster-whisper, pyannote,
docling, anomalib, ONNX

BACKEND & DATA

Bun, Elysia, Go (chi),
FastAPI, gRPC, RabbitMQ,
PostgreSQL, MongoDB,
ScyllaDB, Redis

FRONTEND & INFRA

Next.js, React, Astro,
Tauri, Expo, AWS,
Terraform, Docker, MCP

EDUCATION

Florida Universit ria

Engineer's degree, Robotics

Jul 2022 – Jun 2024

IES L'OM

Vocational diploma, Electrical &
Electronics

LANGUAGES

Spanish	native
English	professional
French	A2

OPEN SOURCE

Node-Discord-Bot

Discord bot framework. 140★, 3M
users across 28k servers. MIT.

Lovely-Logs

Type-safe logging for Node,
browser and Lambda. Zero deps.
MIT.

Ley Abierta

Spanish law as Git, with its search
engine. AGPL-3.0.

SUMMARY

Software engineer. I build production systems end to end, often as the only engineer: Bitcoin indexing, crypto custody for law enforcement, and applied AI for industrial companies. I measure before shipping and self-host when the data can't leave.

EXPERIENCE

Freelance Engineer · consultant

2021 – present

ERP-style operations software and AI systems for industrial SMEs. In production: invoice extraction with a self-hosted 8B vision model (99.2% of fields correct, 1–2 s per document) and on-premise meeting transcription at 5.2× real time on CPU, with diarization. Also visual defect detection and consulting.

Python · TypeScript · FastAPI · Next.js · vLLM · faster-whisper · pyannote
· Postgres · Docker

Trilo Sole engineer

2025 – present

AI workspace where AI coworkers edit docs alongside people. One monorepo ships web, iOS, Android, desktop and a 77-tool MCP server.

TypeScript · Rust · Python · Bun · Elysia · Supabase · Tauri · MCP ·
LiveKit

Satstream Sole engineer

2024 – 2025

Bitcoin indexing API for inscriptions, BRC-20, Runes and Charms: four indexers, sub-second queries, five SDKs, an MCP server and a block explorer. 8 repos.

Go · Rust · Python · ScyllaDB · MongoDB · Postgres · Redis · gRPC · AWS CDK

Asset Reality Engineer

Jul 2022 – Feb 2024

Crypto custody for law enforcement. Primary author of the withdrawal-approval engine and the chain-monitoring service. Platform AUM went from \$200M to \$500M over my 19 months.

Go · TypeScript · React · MongoDB · Postgres · AWS

SELECTED PROJECTS

Ley Abierta

2026

Spanish law since 1835 as Git. Hybrid BM25 + vector search with reranking, scored on 678 questions (recall@10 0.76); QLoRA fine-tune of Qwen3-Embedding-8B.

CompoundFox + Autowealth

2025 – now

Live trading strategy with a public dashboard: +4.89% average monthly since Nov 2025.

Copy Trader

2024 – 2026

Rust copy-trading across Bybit, Binance and Hyperliquid. Copy cycle 20 s → 4 s.

Crossflow Network

2023 – 2024

Cross-chain lending on a Cosmos SDK L1 with threshold signatures.
